

# Narrow Cleats

## E-PN-F

### Main applications

Transversally applied on the belt, the profile assists secure product movement in inclined and declined applications. Mainly used in the food processing industry and for bulk material transport in general.

### Description

Narrow-based T-profile used as a cleat on Habasit TPU conveyor and processing belts. Profiles are applied to the belt surface using a hot air or high frequency welding procedure.

 Limited representative testing based on a standard configuration is carried out to estimate minimum pulley diameters. Please contact Habasit for specific guidance regarding non-standard applications, including, but not exclusively, when profiles or cleats are used, or if the belt working temperature is close to the limits listed in this document.
