

PMR-08 Control unit

The PMR-08 regulating unit is a fully automated controller for hot-pressing devices. It controls all phases of a belt joining cycle including water cooling and the subsequent blowing out of the water with compressed air. The PMR-08 is a compact light unit and easy to handle. Thanks to multiple connections on the back panel it allows two modes of usage: stationary together with PMC cooling unit or mobile, in combination with the PMC-08CD, a mobile cooling unit and a mini compressor.
