## Belt Scraper F-BS-H

Habasit® Belt Scrapers are accessories for belts cleaning, mainly used in the food industry and specifically designed for the most challenging hygienic applications. These are especially efficient on liquids (e.g. water, oil, detergents), thus improving further issues like slipping of products on the belt and of the belt on the drive pulleys.

Compared to a classic scraper, usually made by metal-sheet or hard plastic, the advantages of using a TPU scraper are given by their flexible tip:

- The TPU tip is flexible and can easily adapt to the belt irregularities avoiding scratches or damages.
- The TPU scraping tip will match the belt surface even in case of surface irregularities, resulting in a more efficient cleaning action.

## **Product data**

Technical data	
Material type	TPU Polyether
Hardness	87 ShA

代碼	項目編號	Color	Food grade			Height	Package	Quantity	Units	Box Content
					mm	mm				
E-BS38-HC	H950026260	Cobalt blue	Yes	HC	16.0	60.0	Box	2	М	1 bar (2.4m)

## 所有数据均为标准气候条件下的粗略值: 23°C/73°F, 相对湿度50% (DIN 50005/ISO 554), 并基于主要接著方式。

Limited representative testing based on a standard configuration is carried out to estimate minimum pulley diameters. Please contact Habasit for specific guidance regarding non-standard applications, including, but not exclusively, when profiles or cleats are used, or if the belt working temperature is close to the limits listed in this document.
